Information Sheet

What is it?

- **R**esearch **E**lectronic **D**ata **Cap**ture

- Web-based database & survey tool for research

- REDCap is funded by our Clinical and Translational Science Collaborative (CTSC) grant (http://casemed.case.edu/ctsc/) along with institutional support

Who is it for?

- Available to anyone doing research at any of our CTSC institutions:

    - ✓ University Hospitals

    - ✓ Case Western Reserve University

    - ✓ MetroHealth Medical Center

    - ✓ Cleveland Clinic

    - ✓ VA Medical Center

- REDCap is primarily for researchers collecting research data (including the storing of PHI fields for their research protocols)

- It is also available for use in other ways, just as for Operational Support and Quality Improvement

Why should I use it?

- Keeps your data more organized and more secure than Excel

- You create your own forms – you can collect only the data you want

- No database knowledge needed

- Doesn't require a lot of technical knowledge like Access

- No programming required!

- No cost (yes, it's free!)

- Nothing to install

Information Sheet

What can it do?

Can be used in two ways:

- Traditional Database w/Data Entry Forms

- Electronic Surveys

• Customizable Data Entry Forms, including data validation, min/max ranges, branching logic, etc.

• Data Export Tool & Data Import Tool

• Audit Trail

• User Rights

• Graphical Data View & Stats

• Data Quality Checks

• Report Builder
